

Dear Colleagues,

I am delighted to welcome you to the first issue of the Pharmaceutical and Biomedical Research namely PBR. PBR was founded in 2014 as an international quarterly peer review journal by Faculty of Pharmacy Mazandaran University of Medical Sciences Iran. The goal of PBR is to publish quality papers from researchers and authors worldwide in all areas of pharmaceutical and biomedical sciences. PBR is absolutely inviting all contributors to share their experiences in pharmaceutical sciences with our readership. I was selected as the editor in chief of PBR by the faculty members in spring 2014. In this first issue the editorial board and I invited authors to present quality manuscripts to PBR. I tried to select manuscript topics that covered main branches of pharmaceutical and biomedical sciences. The manuscripts were peer-reviewed by expert international and national reviewers. Manuscripts were accepted after peer-reviewing and revising by authors and finally they were checked and decided by me and the associate editors. In this issue we tried to have a rapid peer-review and publication process; I hope this process will continue for all manuscripts in the future. To distinguish PBR from other pharmaceutical and biomedical journals we want to provide a rapid review response to our authors. For this goal I decided to add associate editors to the journal editorial board. They will handle manuscripts and select helpful reviewers for peer review process. This will reduce review process time as short as possible. I encourage you to submit your best research work to the PBR. For saving time for peer review and publication process I encourage authors to prepare their manuscripts according to the journal format. Since review articles are an important part in pharmaceutical sciences; I invite prominent scientists to submit high quality reviews to PBR.

On behalf of the editorial board members, associate editors and PBR readers, we look forward to receiving your manuscripts and welcome your ideas and comments for PBR.

Best wishes

Editor in Chief, Seyed Jalal Hosseinimehr, PhD
